Pack Qty: 6
Pack Size: 350x248x72mm

Fantastic Fathers Day Gift

Bamboo is actually a grass and as a result has a long, running grain that makes for incredibly durable and flexible material. It is also superior to wood in terms of its water-resistant features and therefore will never become soft, waterlogged, cracked or warped which makes for excellent garden tools.

The largest of the grass family, bamboo grows readily having an intricate root system that allows the same plant to regenerate itself, which means it can be re-harvested for many years. It grows in large amounts and can be selectively harvested annually. This makes bamboo one of the most renewable and abundant natural resources on the planet.

The Thirsty Gardener
